EXECUTIVE SUMMARY

- Licensed Professional Engineer (P.Eng) and certified Project Management Professional (PMP) with over 15 years of expertise in delivering complex software programs and driving digital transformation in financial services, telecommunications, and technology sectors.
- Proven track record in program management, software delivery, application modernization, platform engineering, and aligning deliverables with organizational objectives using Agile methodologies.
- Expertise in Agile frameworks (Scrum, Kanban) and software development lifecycle (SDLC), systems architecture, enabling high-quality outcomes within tight timelines and budgets.
- Skilled at managing multi-disciplinary teams, translating technical requirements into actionable strategies, and facilitating stakeholder collaboration to ensure seamless execution, leveraging Agile practices like sprint planning, backlog grooming, and iterative delivery.
- Recognized for delivering enterprise-wide transformation and cross-functional coordination, while leveraging tools like Jira, Confluence, and MS Project to track progress and mitigate risks.

PROFESSIONAL EXPERIENCE

Scotiabank

Senior Delivery Manager, Development - Global Wealth Management Technology, Feb. 2025 – Present

- Lead a high-performing full-stack engineering team of 15–20 (architects, developers, QA, DevOps) to design, build, and scale an International Wealth Management Platform for Latin American markets, launching first in Chile (FY26).
- Define and own solution architecture and technical direction, developing microservices and microapps using Spring Boot (Java) and React, deployed on Google Cloud Platform (GCP) for secure, cloud-native performance.
- Champion engineering excellence through robust CI/CD practices, code reviews, observability (Dynatrace, Splunk), and structured release and change management processes.
- Mentor and empower engineers across disciplines while collaborating with executive and product stakeholders to set priorities, manage dependencies, and align team growth with strategic delivery goals.

Sourced Group (Amdocs)

Senior Delivery Manager, Solutions Enablement, Professional Services Jan. 2022 – Jan. 2025

- Led large-scale cloud transformation and delivery programs across telecommunications, banking, and healthcare sectors. Managed multi-stream cloud migrations, DevOps modernization, and security architecture initiatives across Azure, AWS and GCP platforms, driving measurable outcomes.
- Demonstrated executive-level account management expertise, building trusted relationships with senior stakeholders and enabling partnership-driven delivery success.
- Led a 10-stream migration program for a telecom client, transitioning on-premise Customer Experience Systems (Billing, CRM, Ordering) to AWS, improving scalability, resiliency, and cost efficiency.
- Led non-functional testing and observability initiatives for a leading Canadian bank, enhancing platform reliability, monitoring, and performance visibility through GCP observability dashboards.
- Implemented pattern factory methodologies, network security upgrades, and hybrid cloud controls, strengthening infrastructure agility, compliance, and governance.
- Drove DevOps assessments, Agile transformation, and cloud operating model design for a digital health organization, enabling sustainable adoption and operational maturity.

TD Canada

Senior Technology Delivery Lead, Delivery Shared Services - Technology, *Feb 2017. 2021 – Dec.2021*

- Led high-impact initiatives, including the TSYS Network Migration supporting over 16,000 North American users within Canadian Cards Technology across Debit, Visa, and MBNA.
- Migrated 25+ enterprise applications to AWS Cloud, addressing platform constraints, optimizing scalability, and modernizing infrastructure.
- Led technical architecture, network deployment, and cloud governance, ensuring secure, compliant, and highly available enterprise solutions
- Automated insurance platform workflows, integrating document ingestion pipelines and enhancing mobile application functionality through cloud-native services
- Implemented advanced monitoring and Big Data solutions (Reveille, Hadoop), improving observability, analytics, and operational performance.
- Directed remediation of 368 enterprise applications and deployed a secure executive messaging platform, ensuring Windows 10 readiness, compliance, and robust access control.

Deloitte Canada

Consultant, Digital Integration – Technology, *Jan. 2015 – Sep. 2016*

- Designed and implemented seamless data migration frameworks for the Source to Pay (S2P) process, including integrations with Guidewire platforms.
- Conducted technical gap analyses in collaboration with IBM, resulting in robust deployment strategies.
- Engineered integrations using ESB and Message Queues, ensuring efficient data flow and communication.
- Proficient in strategic sales pursuits and proposal management, collaborating closely with legal teams to structure and negotiate long-term client agreements.

INTERNSHIPS (details on LinkedIn)

- **University of Waterloo**, Campus Ambassador, Engineering (W2014), BlackBerry (W2010)
- **Manulife Financial & BlackBerry (RIM)**, Project Management (W2013 & W2011)
- **Apple**, iOS Software Engineering (S2010)
- **BlackBerry**, Software Tools & Support Specialist (W2009 & F2009)
- **University of Guelph**, Biotech Research Assistant (S2007 & S2008)

EDUCATION

SAFe 6 Lean Portfolio Manager (LPM)

Scaled Agile, Inc, Nov. 2024

Professional Engineer (P.Eng)

Professional Engineers Ontario, Mar. 2021

Certified Scrum Master (CSM)

Scaled Agile, Inc, Feb. 2018

Project Management Professional (PMP)

Project Management Institute, Nov. 2017

Bachelor of Applied Science, Honours, Electrical and Computer Engineering - Co-op

University of Waterloo, 2008 – 2014

INTERESTS

University of Waterloo Alumni: Entrepreneurial Coaching, Engineering Design Project Consultant, Speaker, Community Building

Hobbies: Podcast, Dance, Photography & Music

Sports: Basketball, Badminton & Cricket
